SUMMARY & CAREER OBJECTIVES

I had a good foundation in SQL and Core Programming skills in Python. I had enough experience in delivering good quality and User-experienced applications in projects I was involved in (including my undergraduation too). Apart from my work, I want to secure a responsible career opportunity to fully utilize my training and skills. I am very keen on learning new things each and every day and always keep myself engaged in learning new things that I'm interested in.

EDUCATION

Lendi Institute of Engineering And Technology, Vizianagaram — B.Tech.

2018-2022

ECE graduate with 8.13/10 CGPA.

EXPERIENCE

Developer and Tester —

- I have a strong development knowledge of Python along with a deep understanding of system architecture, enabling me to build robust and scalable software solutions.
- Managing different modules (CPQ, Oracle Mobile app) and ensuring robust testing and its reliability.
- I have good experience in leading UAT and ISRT sessions ensuring every functionality and requirement is fulfilled.
- Before joining TCS, I played an important role in providing a solution to a project that deals with ML based Ambulance Detection System.
